

AquaKlean 403

An anionic paraffin/polyethylene wax emulsion ideal for cleanability and water repellency in architectural coatings

Features and Benefits

- Provides excellent initial water beading and long term water repellency
- Imparts soil release for improved cleanability
- Imparts slip, antiblocking, scratch and abrasion resistance
- Wax emulsion particle does not reduce gloss or clarity
- Anionic emulsion stabilization contributes to immediate hydrophobicity

Wax Type

Polyethylene/paraffin

Recommended Addition Levels

3.0-10.0% (on total formula weight)

Systems and Applications

Water based coatings. Industrial coatings (including masonry); architectural wall and trim paints; stains, sealers and varnishes; wood coatings; automotive polishes.

Typical Properties*

AquaKlean 403

| | |
|-------------------------------|------------|
| Emulsifier Type | Anionic |
| Appearance | Tan Liquid |
| Total Solids | 30% |
| Viscosity @ 25 °C (cP) | <200 |
| pH | 9.0 - 10.0 |
| Density @ 25 °C (g/cc) | 1.00 |
| Wax melting point | 120 °C |
