

MicroKlear 418OR

Micronized organic Copernicia cerifera (Carnauba) wax for use as an additive in seed coatings and organic agricultural products

Features and Benefits

- Provides surface lubricity and abrasion resistance to minimize dust formation
- Improves flow and minimizes anti-blocking
- 100% natural and biodegradable
- Easy to disperse fine powder that can be incorporated with high speed mixing
- Select MicroKlear 418 if organic certification is not required

Composition

Organic carnauba wax

Renewable Carbon Index

100%

Recommended Addition Levels

Varies depending on use (on total formula weight)

Systems and Applications

Seed coatings and other organic agricultural products.

Typical Properties*

	<u>MicroKlear 418OR</u>
Melting Point °C	81 - 86
Density @ 25 °C (g/cc)	1.00
NPIRI Grind	2.0 - 3.5
Maximum Particle Size (µm)	22.00
Mean Particle Size (µm)	6.0 - 8.0

THIS IS A MADE TO ORDER PRODUCT WITH MINIMUM ORDER QUANTITIES AND EXTENDED LEAD TIMES
